

Work plan July – September

Mark Blyth

Plan

Short presentation this time!

- ✦ Ideas a september conference paper should cover
- ✦ Work that needs to be done for that to happen

Conference paper goal

- ✶ Highlight issues with Fourier discretisation

Conference paper goal

- ✶ Highlight issues with Fourier discretisation
 - ▶ Noise, dimensionality

Conference paper goal

- ✦ Highlight issues with Fourier discretisation
 - ▶ Noise, dimensionality
- ✦ Show how surrogate modelling fixes noise

Conference paper goal

- ✦ Highlight issues with Fourier discretisation
 - ▶ Noise, dimensionality
- ✦ Show how surrogate modelling fixes noise
- ✦ Show how surrogate model can be discretised with standard techniques, for lower dimensionality than Fourier

Conference paper goal

- ✦ Highlight issues with Fourier discretisation
 - ▶ Noise, dimensionality
- ✦ Show how surrogate modelling fixes noise
- ✦ Show how surrogate model can be discretised with standard techniques, for lower dimensionality than Fourier
 - ▶ Ideally, surrogate model will discretise data, but there's still value in having separate surrogate and discretisation steps

Conference paper goal

- ✿ Highlight issues with Fourier discretisation
 - ▶ Noise, dimensionality
- ✿ Show how surrogate modelling fixes noise
- ✿ Show how surrogate model can be discretised with standard techniques, for lower dimensionality than Fourier
 - ▶ Ideally, surrogate model will discretise data, but there's still value in having separate surrogate and discretisation steps
- ✿ Other CBC arguments

Conference paper goal

- ✂ Highlight issues with Fourier discretisation
 - ▶ Noise, dimensionality
- ✂ Show how surrogate modelling fixes noise
- ✂ Show how surrogate model can be discretised with standard techniques, for lower dimensionality than Fourier
 - ▶ Ideally, surrogate model will discretise data, but there's still value in having separate surrogate and discretisation steps
- ✂ Other CBC arguments
 - ▶ More accurate signal reconstruction from discretisation?

Conference paper goal

- ✦ Highlight issues with Fourier discretisation
 - ▶ Noise, dimensionality
- ✦ Show how surrogate modelling fixes noise
- ✦ Show how surrogate model can be discretised with standard techniques, for lower dimensionality than Fourier
 - ▶ Ideally, surrogate model will discretise data, but there's still value in having separate surrogate and discretisation steps
- ✦ Other CBC arguments
 - ▶ More accurate signal reconstruction from discretisation?
 - ▶ Faster control-target evaluation?

Conference paper goal

- ✂ Highlight issues with Fourier discretisation
 - ▶ Noise, dimensionality
- ✂ Show how surrogate modelling fixes noise
- ✂ Show how surrogate model can be discretised with standard techniques, for lower dimensionality than Fourier
 - ▶ Ideally, surrogate model will discretise data, but there's still value in having separate surrogate and discretisation steps
- ✂ Other CBC arguments
 - ▶ More accurate signal reconstruction from discretisation?
 - ▶ Faster control-target evaluation?
 - ▶ Discretisation-free prediction step?

Missing things

- ✦ Discretise the cleaned surrogate-modelled signal

Missing things

- ✦ Discretise the cleaned surrogate-modelled signal
 - ▶ Conduct a mini-survey of available discretisation methods

Missing things

- ✦ Discretise the cleaned surrogate-modelled signal
 - ▶ Conduct a mini-survey of available discretisation methods
 - ▶ Use a discretisation that encodes periodicity, ideally a hybrid surrogate and discretisation

Missing things

- ✦ Discretise the cleaned surrogate-modelled signal
 - ▶ Conduct a mini-survey of available discretisation methods
 - ▶ Use a discretisation that encodes periodicity, ideally a hybrid surrogate and discretisation
- ✦ Rigorous validation of models

Missing things

- ✦ Discretise the cleaned surrogate-modelled signal
 - ▶ Conduct a mini-survey of available discretisation methods
 - ▶ Use a discretisation that encodes periodicity, ideally a hybrid surrogate and discretisation
- ✦ Rigorous validation of models
 - ▶ Start writing paper at this point!

Missing things

- ✎ Discretise the cleaned surrogate-modelled signal
 - ▶ Conduct a mini-survey of available discretisation methods
 - ▶ Use a discretisation that encodes periodicity, ideally a hybrid surrogate and discretisation
- ✎ Rigorous validation of models
 - ▶ Start writing paper at this point!
- ✎ *Comparison of BARS / GPR to other popular time series models*

Missing things

- ✿ Discretise the cleaned surrogate-modelled signal
 - ▶ Conduct a mini-survey of available discretisation methods
 - ▶ Use a discretisation that encodes periodicity, ideally a hybrid surrogate and discretisation
- ✿ Rigorous validation of models
 - ▶ Start writing paper at this point!
- ✿ *Comparison of BARS / GPR to other popular time series models*
- ✿ *Run simple transformations (logs, sigmoids) for GPR on non-stationary signals*

Missing things

- ✂ Discretise the cleaned surrogate-modelled signal
 - ▶ Conduct a mini-survey of available discretisation methods
 - ▶ Use a discretisation that encodes periodicity, ideally a hybrid surrogate and discretisation
- ✂ Rigorous validation of models
 - ▶ Start writing paper at this point!
- ✂ *Comparison of BARS / GPR to other popular time series models*
- ✂ *Run simple transformations (logs, sigmoids) for GPR on non-stationary signals*
- ✂ Warping GPRs for automatically transforming nonstationary signals

Missing things

- ✂ Discretise the cleaned surrogate-modelled signal
 - ▶ Conduct a mini-survey of available discretisation methods
 - ▶ Use a discretisation that encodes periodicity, ideally a hybrid surrogate and discretisation
 - ✂ Rigorous validation of models
 - ▶ Start writing paper at this point!
 - ✂ *Comparison of BARS / GPR to other popular time series models*
 - ✂ *Run simple transformations (logs, sigmoids) for GPR on non-stationary signals*
 - ✂ Warping GPRs for automatically transforming nonstationary signals
 - ✂ Testing discretisation results on in-silico CBC
-
